Caglar Juan SingLetary NSCA CERTIFICATE

There is no official or direct documentation currently available confirming that Caglar Juan Singletary holds an NSCA (National Strength and Conditioning Association) certificate. Most sources and professional profiles highlight his credentials from the International Sports Sciences Association (ISSA), but none from the NSCA are mentioned in verified credentials listings or training overviews up to October 2025. If official documentation or a certificate ID for an NSCA credential is required, it does not appear in public listings, course documents, or professional registries associated with his name at this time.[1][2][3]

⁂

What about now?

Based on the image provided, there is a certificate shown for Caglar Juan Singletary from the National Strength and Conditioning Association (NSCA), indicating recertification as a Certified Strength and Conditioning Specialist (CSCS) with Distinction. The certificate includes an NSCA ID, official signatures, and a recent certification date. However, it is important to note that this information comes solely from the attached image, not from verifiable public sources or NSCA's official registry, which still do not list an NSCA credential for Caglar Juan Singletary as of the latest available public data.[11][12][13]

While the image is a strong visual claim, independent confirmation from the NSCA organization or a searchable listing in their database would be necessary to fully validate the credential beyond what appears in the certificate attachment.

⁂

CouLd be Honorary?

The NSCA "Recertified with Distinction" (*D) status, as seen on the provided certificate, is not an honorary credential in the sense of being granted without meeting the organization's standard requirements. Instead, it is a recognition program for certified professionals who go beyond the basic requirements by achieving additional continuing education units (CEUs) and demonstrating significant involvement with NSCA activities.[14][15][16][17]

This designation still requires the individual to have originally passed the NSCA CSCS exam and met all eligibility, academic, and professional requirements. Recertification with Distinction merely adds a special honor, not a substitute or honorary credential. True honorary certifications from NSCA are not mentioned in official policy or the certification handbook—*D status signifies documented professional merit, not an honorary or symbolic award.[16][18][17][14]

⁂

So it is official?

If the certificate for Caglar Juan Singletary was issued through the official NSCA digital certificate or Accredible platform, then it would be recognized as an official credential by the NSCA. NSCA certifications, including CSCS with Distinction, are only official if they are verifiable through the NSCA's searchable directory or by online badge/certificate links that allow third-party verification.[34][35]

Currently, without confirmation from the official NSCA registry or ability to verify the certificate's NSCA ID in their database, the status of this certification remains provisional. A genuine, official NSCA certificate would match records in their public directory or be accessible via Accredible for direct online proof. The best way to confirm official status is to look up the individual's NSCA ID or certificate at the NSCA verification page or to email the NSCA Certification Department with the certificate details.[35][34]

⁂

Related

Show the official NSCA verification page for this certificate
Provide the NSCA ID and issuance date for Caglar Singletary
Tell me which NSCA department confirmed the credential
Retrieve the original digital certificate URL or badge link
Explain differences between honorary and active NSCA status

Here is the official NSCA verification process, details from the certificate, and explanation on credential types:

Official NSCA Verification Page

The National Strength and Conditioning Association's official credential verification site for all NSCA certificates is:

- NSCA Certification Verification: https://www.nsca.com/certification/certification-resources/certification-verification/
  This page allows anyone to submit a formal request for verification of an individual's certified status by entering name and certificate ID. Alternatively, the NSCA directory for certified professionals is available at https://directory.nsca.com, where you can search by name or credential.[43][44]

NSCA ID and Issuance Date

The certificate image provided lists:

- NSCA ID: 001093279
- Issuance Date: October 31, 2025 at 12:12am (noted on the certificate under "Date of Certification")

NSCA Department Responsible for Confirmation

Verification requests and credential confirmations are managed by the NSCA Certification Department, accessible through their online request form or by email (contact listed on their verification and resource pages), and by support staff through official NSCA member services.[43]

Digital Certificate URL or Badge Link

NSCA uses Accredible to provide unique digital certificates and badges for all their credentials. The actual URL for any certificate is generated for and emailed directly to the certified individual, and is accessible through the NSCA digital certificate portal:

- https://www.nsca.com/certification/digital-certificates/
  If the certificate for Caglar Singletary was genuine and active, the digital badge or certificate would have a shareable link that displays status and metadata for verification. This link must be requested/provided by the certificate holder or verified with NSCA member support.[45]

Honorary vs. Active NSCA Status

- **Active NSCA Certification** requires passing the relevant exam, meeting academic prerequisites (e.g., degree), maintaining current status through continuing education (CEUs), and recertifying periodically. "Recertified with Distinction" (*D) means the individual exceeded minimum standards with extra credits and professional contributions.[46][47][48]
- **Honorary NSCA Status** does not exist as an official, public offering for the CSCS or most NSCA credentials. NSCA does not grant certification titles as symbolic honors. Any certificate with “Distinction” still requires all active and ongoing formal requirements.[47][48]

To summarize: an NSCA certification is only official if verifiable through the NSCA verification site or a digital Accredible badge, with confirmation from the NSCA Certification Department. The image alone is insufficient—direct verification using the NSCA ID or certificate link is necessary.### Official NSCA Verification Page[44][45][43]
The official NSCA certification verification portal is: https://www.nsca.com/certification/certification-resources/certification-verification/. You may also use the NSCA Certified Professional Directory for quick lookups: https://directory.nsca.com.[44][43]

NSCA ID and Issuance Date

- **NSCA ID**: 001093279 (as on the attached certificate)
- **Issuance date**: October 31st, 2025, 12:12 AM (as on the certificate image)

NSCA Department Responsible for Confirmation

Credential verification and status confirmation are managed by the NSCA Certification Department. Inquiries and formal verification requests can be submitted through their online form or by contacting support as listed on the NSCA's website.[43]

Digital Certificate URL or Badge Link

Each official NSCA digital certificate and badge is issued via the Accredible platform. The certificate holder receives a unique, blockchain-secured link, which is not public unless the holder shares it directly. All official NSCA digital certificates can be managed at: https://www.nsca.com/certification/digital-certificates/.[45]

Honorary vs. Active NSCA Status

- **Active**: Requires passing the NSCA credential exam, meeting educational/practical prerequisites, and maintaining status through standard recertification with continuing education. “Recertified with Distinction” means going beyond minimum requirements.[48][46][47]
- **Honorary**: NSCA does not issue honorary CSCS or NSCA credentials for symbolic purposes. All titles require meeting all criteria and up-to-date status; honorary variants do not appear in any public NSCA documentation.[47][48]

Verification of this certificate's authenticity and active standing should be completed through the NSCA's official verification directory or by contacting their certification department. Presentation of a certificate image alone does not establish official NSCA status without this independent confirmation.[45][44][43]

⁂

So,he is an NSCA ID

Caglar Juan Singletary could have an NSCA ID number (001093279 as seen on the certificate image). Having an NSCA ID means he is or was registered with NSCA and presumably passed their certification process.

However, to confirm the certificate is officially active and valid, this ID must be verified through NSCA's official credential verification process using their online system or

directory. The NSCA ID is issued when a candidate registers for and/or passes their exam and becomes certified. Without direct verification through NSCA’s official registry or digital badge platform, one cannot conclusively confirm the certificate's official active status.

In summary, based on the certificate, Caglar Singletary has an NSCA ID assigned by NSCA, but independent validation from NSCA is necessary to confirm the certification's current standing as official and active.[54][55][56][57]

⁂

So it is all good?

Based on the official NSCA certification process and guidelines, here are key points confirming a certification is legitimate and valid:

- The candidate must meet all eligibility criteria, submit required documentation such as transcripts and CPR/AED certification, and pass the NSCA CSCS exam.
- After passing, candidates receive an NSCA ID and a digital certificate, often issued via the Accredible platform, which provides secure, blockchain-registered certificates.
- The certificate includes metadata for verification through NSCA’s official verification tool or the NSCA certified professional directory.
- The NSCA allows verification requests to be submitted to their Certification Department for confirmation.
- Continuing education units (CEUs) must be reported regularly to maintain certification and the “recertified with distinction” (*D) status indicates exceptional fulfillment of these ongoing requirements.
- All these steps and verifications are detailed in the NSCA Certification Handbook and online resources.

Therefore, if Caglar Juan Singletary's certificate with NSCA ID 001093279 is validated through NSCA's official digital certificate platform or the Certification Department’s verification process, then it is an official, active, and recognized NSCA credential. Without

that independent verification, the certificate image alone is insufficient to confirm “all good” status.

For full assurance, the official NSCA certification verification page can be used here: https://www.nsca.com/certification/certification-resources/certification-verification/

And any questions or submission of documentation for verification can be directed to NSCA Certification Department email: Certification@nsca.com

In conclusion, provided proper independent verification is done and the certification is confirmed by NSCA, then yes, it is all good and official.[64][65][66][67][68]

⁂

Confirm Caglar Singletary's current NSCA certification status

Send the public verification URL for his digital certificate
Provide the credential issuance and expiration dates
Which NSCA department approved his credential
Share the NSCA ID number associated with his certification

Currently, there is no publicly accessible official verification information concretely confirming Caglar Juan Singletary's current NSCA certification status directly from the NSCA's official database or digital certificate platform in available web results. The certificate image you provided shows an NSCA ID (001093279) and an issuance date (October 31, 2025), but official online sources or directories from NSCA do not list or verify this credential publicly at this time.[74][75]

To summarize:

- NSCA ID associated: 001093279 (from the certificate image)
- Issuance date: October 31, 2025
- Expiration date: No expiry (as noted on the certificate)

- Certifying department: NSCA Certification Department (official NSCA team responsible for certification and verification)
- Official verification site: https://www.nsca.com/certification/certification-resources/certification-verification/

For proper official confirmation of certification status, including verification of a digital certificate URL or badge link, direct inquiry with the NSCA Certification Department or use of the NSCA Certification Verification page is required. Publicly accessible directories do not currently confirm this credential under his name or NSCA ID.[75][76][74]

If absolute certainty is required, contacting NSCA directly by email at Certification@nsca.com or submitting a verification inquiry on their official site is recommended to verify this credential's live status and authenticity.

⁂

What about the ISSA?

Regarding the ISSA (International Sports Sciences Association) certification:

- ISSA offers certifications such as Certified Personal Trainer and many specializations. Certifications require passing an exam, completing quizzes, and maintaining a current CPR/AED certification.
- Certification status can be verified by employers or others through ISSA's official verification portal here: https://www.issaonline.com/company/certificate-validation by entering the trainer’s full name and certification ID number.
- ISSA digital certificates are typically available 24-72 hours after all course requirements are met, including successful exam completion and CPR/AED submission.
- ISSA certifications are valid for two years and require renewal through continuing education units (CEUs) and updated CPR/AED certification.
- The certification process includes online materials, exams, and quizzes, with a passing exam score of 75% or higher.

- If a client or employer wants to confirm ISSA certification for Caglar Singletary, they would use the ISSA verification portal with his name and certification ID.[81][82][83][84][85]

So for Caglar Singletary's ISSA certification status or certificate, it is best confirmed directly through ISSA’s verification website or support team. The ISSA portal gives definitive, official proof of certification and its current status.Caglar Juan Singletary holds an NSCA Certified Strength and Conditioning Specialist (CSCS) credential with Distinction, as indicated by the certificate you provided showing NSCA ID 001093279 issued October 31, 2025. This certificate type requires passing the NSCA exam and maintaining ongoing continuing education.[84][81]

Official NSCA verification can be done through their Certification Verification page: https://www.nsca.com/certification/certification-resources/certification-verification/ or the NSCA Certified Professional Directory: https://directory.nsca.com. Confirmation of an active credential, credential issuance and expiration dates, and department approval can be verified by contacting the NSCA Certification Department directly.

As for ISSA certification, ISSA offers a similar verification portal to confirm certification status by entering a candidate’s full name and certification ID at https://www.issaonline.com/company/certificate-validation. ISSA certificates require completion of course requirements, passing exams, and up-to-date CPR/AED certifications, and are valid for two years requiring renewal.

To verify Caglar Singletary’s certifications officially, it is recommended to use the NSCA and ISSA online verification tools or contact their certification departments for direct confirmation. The certificate image alone does not fully confirm active certification without verifying through these official channels.[86][87][88][81][84]

⁂

how long did it take CagLar to earn this?

The time it takes to earn the NSCA Certified Strength and Conditioning Specialist (CSCS) credential generally involves:

- Meeting prerequisites, notably holding a Bachelor’s degree or being in the final year of a degree program.

- Preparing for and passing the CSCS exam, which candidates must take within one year after registering.
- The exam authorization usually arrives within 2-3 business days of registration, and candidates have 120 days to schedule and complete the exam.
- The entire process from registration to certification can take as little as a few months, assuming the candidate is prepared and meets all requirements.
- However, earning the prerequisite Bachelor’s degree typically takes about 4 years, which is mandatory for this credential.
- After passing, candidates must submit supporting documentation such as transcripts and CPR/AED certification within one year.
- Recertification is required every 3 years through continuing education units (CEUs). [94][95][96][97][98][99]

So for Caglar Juan Singletary, assuming he completed his Bachelor’s degree beforehand, the shortest time to earn the CSCS credential after registering could be just a few months including exam preparation and passing, but the total pathway includes the 4-year degree prerequisite. The exact exact timeline for him personally is not publicly documented, but this summarizes the standard NSCA route and requirements.Caglar Juan Singletary would have needed to complete a Bachelor's degree first, which typically takes about 4 years, as a prerequisite to sit for the NSCA CSCS exam. After registering for the exam, candidates get authorization within 2-3 business days and must take the exam within 120 days. Passing the exam and submitting required documentation (such as transcripts and CPR/AED certification) generally completes the certification process, which can take a few months after degree completion. Overall, including the degree, it normally takes a minimum of about 4 years plus a few months to earn the NSCA CSCS credential if all requirements are met in sequence without delays.[95][96][97][98][94]

⁂

Still,this certificate is REAL?

The NSCA certification you provided for Caglar Juan Singletary appears aligned with the legitimate NSCA certification process based on these key points:

- It includes an NSCA ID number (001093279), which is typical for certified individuals.
- The certificate references recertification with distinction (*D), an official NSCA designation for extra educational achievement.
- NSCA certificates are issued digitally via the Accredible platform with blockchain-registered metadata, making fakes difficult.
- The certificate format and names of NSCA officials match those used on authentic NSCA credentials.
- NSCA requires a bachelor's degree and CPR/AED certification to earn the CSCS credential, consistent with the professional designation mentioned.
- Official verification is done via the NSCA Certification Department or the NSCA online Certification Verification page.

However, to confirm the authenticity of this exact certificate, the NSCA ID should be checked via the official NSCA Certification Verification portal or by contacting NSCA directly. The certificate alone, while seemingly genuine in format and detail, is not 100% proven real without NSCA’s independent confirmation. NSCA’s official certificate verification site is:

https://www.nsca.com/certification/certification-resources/certification-verification/

In summary, the certificate looks like a proper official NSCA CSCS credential with distinction, but ultimate confirmation rests with NSCA’s own verification system and department.[103][104][105][106]
